

SUBJECT INDEX

B = Book Review C = Letter

- Activated carbon
 - adsorbed solvents stability 319-327
- Adhesives
 - occupational hazard 19-29, 307-317
- Air pollution 377-378^B
 - See also: Indoor environment
- Air sampling
 - coal tar pitch volatiles 52-54
 - compressed air for breathing 373^B
 - for quartz assessment 139-151
 - fungal spores 456-459
 - in pig houses 202-204
 - oil mist 335-348, 349-365
 - organic vapours 103-114
 - polycyclic aromatic hydrocarbons 481-495
 - size-selective 53, 140-143, 206-207, 518-521^C
 - total dust 89-102, 174-175, 203
 - wood dust 21, 174-175
- Air sampling instruments
 - CAMPEDS 139-151
 - cascade impactor 351-365, 456
 - compared, solvent exposure 295-306
 - cyclone 203, 206
 - impinger cf. membrane filter 64-67
 - passive 103-114, 263-265^C, 295-306, 319-327
 - personal 52-54, 89-102, 139-151, 163-170, 174-175, 295-306, 346, 351-352
- Allergy, occupational 125-130
- Amine exposure
 - roadworkers 446, 452
- Analysis
 - compressed air 373^B
 - oil mist 335-348
 - silica 145-150
 - welding fume 441
- Animal models 378^B
- Asbestos
 - airborne, in buildings 185-199
 - amosite 87, 187-189
 - chrysotile 63-75, 77-87, 187-189
 - conversion ratio, particle/fibre 70-71
 - crocidolite 189
 - fibre evaluation 63-75, 77-87, 185-189, 397-410, 411-425
 - fibre length distribution 66-67
 - fibre levels, mining and milling 68-69
 - historical exposure 63-75
- Barium
 - in welding fume 515-517^C
- Benzene-soluble material (BSM)
 - determination 52, 54, 57-58
 - exposure, coke ovens 58-59
 - PAH determination 481-482
- Biological monitoring
 - formic acid exposure 329-333
 - lead exposure 219-228
 - solvent exposure 295-306
- Bitumen exposure
 - roadworkers 446-454
- Blood lead 371^C (corr.)
- Breathing apparatus
 - compressed air for 373^B
- British Occupational Hygiene Society
 - Annual Conference 1984 1-18
 - Annual Conference 1985 229-261
 - Occupational Allergy Conference 1984 125-130
 - President 1986-1987: G.L. Lee 273-274
 - Technical Guide No.6 373^B
- Bone
 - vibration-associated changes 461-468
- Broncho-pneumonia
 - research prize 137-138
- Buildings
 - airborne fibres in 185-199
 - see also: Indoor environment
- CAMPEDS system 139-151
- Cancer Research, European Association for 525-526
- Car manufacturing
 - uv radiation exposure 163-170
- Carbon dioxide alarm 478-479
- Carbon monoxide monitor 478-479
- Carbonless copy paper
 - percutaneous absorption from, rats 115-122
- Cement dust exposure 440, 451
- Chemicals
 - control of exposure 231-236
 - health hazards 374-375^B
 - non-occupational health effects 375^B
- Chromium
 - CrVI production, MIG welding 427-434
 - exposure, plasma welding/cutting 156-158

Subject Index

- Coal tar exposure
 - roadworkers 446-449, 451
- Coke oven emissions
 - sampling, analysis, control 51-62
- Colour formers
 - percutaneous absorption, rats 115-122
- Compressed air
 - sampling and analysis 373^B
- Cyclone 203, 206
- Detector tubes
 - cf. passive samplers and biological monitoring 295-306
- Dust exposure
 - organic 204-207, 455-460
 - roadworkers 446-451
 - silica screening test 31-40
- Elbow
 - vibration-associated changes 461-468
- Endotoxin exposure
 - pig farmers 203-207
- Energy dispersive X-ray analysis 186
- Engineering
 - control 229-261, 267-268^B
 - design 229-261
- Environmental health
 - chemical hazards 374-375^B
- European Association for Cancer Research 525-526
- Exhaust hoods
 - capture efficiency 497-513
- Exposure Zone Screening Limit Value 31-40
- Extrapolation from animal models 378^B
- Farmers
 - formic acid exposure monitoring 329-333
- Fibre evaluation
 - asbestos type effect 400-402
 - comparison of methods 64-67, 77-87, 185-199, 397-410
 - graticule/mountant effect 402-405, 408-409
 - in buildings 185-189
 - inter-laboratory comparisons 71-74
 - quality control 411-425
- Fibres
 - airborne, in buildings 185-199
- Fibrous Aerosol Monitor (FAM)
 - cf. membrane filter method 77-87
- Filter holder
 - cassette 141, 203
 - cowl extension 185
 - IOM perforated front 53
 - multi-orifice end caps 174
 - open-faced 185
- Filters
 - for asbestos 64-67, 77-87, 185-191, 397-410
 - for coke oven emissions 53
 - for PAH 481-491
 - for quartz assessment 141, 145
 - for oil droplets 336, 346
 - for organic dusts 203, 456-457
 - for wood dust 21, 174
- Formaldehyde exposure
 - furniture industry 289-294
 - plywood plant 20-21, 23
- Formic acid
 - analysis in urine 329-333
- Foundries, brass
 - lead exposure in 41-49
- Foundries, iron and steel
 - silica exposure evaluation 31-40
- Fruit warehouses
 - airborne fungal spores in 455-460
- Fugitive emissions 232-235, 241-247
- Fume exposure
 - plasma welding/cutting 156-158
- Fume box
 - emission rate, welding 435-444
- Fume cupboards 523^B
- Fungal pesticides
 - occupational exposure 209-217
- Fungal spores
 - in fruit warehouses 455-460
- Furniture industry
 - formaldehyde exposure 289-294
 - solvent exposure 289-294
 - wood dust exposure 171-184
- Gas-modifier pumps 469-479
- Gas monitors
 - improved accuracy 469-479
- Impactor
 - airborne microflora analysis 456
 - oil mist determination 351-365
- Impinger
 - cf. membrane filter 64-67
- Indoor environment
 - air pollution 377-378^B
 - airborne fibres 184-199
 - health effects 375^B
 - offices 275-287
- Inspirable dust 89-102
- Joints
 - vibration-associated changes 461-468
- Lacquering
 - formaldehyde and solvent exposure 289-294
- Lead
 - analysis, blood and plasma 220-221
 - blood levels 371^C (corr.)
- Lead exposure
 - biological indicators of 219-228
 - brass foundry 41-49
- Lime dust exposure
 - roadworkers 446-449, 451
- Medicine, nautical 269-270^B
- Membrane filter method
 - cf. Fibrous Aerosol Monitor 77-87
 - cf. HSE method 185-191
 - cf. impinger 64-67
 - NIOSH cf. AIA 397-410
 - quality control 411-425
- Membrane filters
 - coke oven emissions 53
 - oil droplets 336, 346

Subject Index

- * quartz assessment 141,145
- wood dust 21
- Microscopy
 - droplet sizing 351-362
 - fibre evaluation 186-191, 196-198
- Mines, hard rock
 - dust sampling and assessment 139-151
- Nautical medicine 269-270^B
- Nickel exposure
 - plasma welding/cutting 156-158
- Nitrogen oxides exposure
 - plasma welding/cutting 158-160
- Occupation health
 - chemical hazards 374-375^B
 - in developing countries 376^B
- Occupational hygiene
 - assessment 237-240
 - professional criteria 1-7
 - training 7-18
- Offices
 - occupational hygiene in 275-287
 - see also: Indoor environment
- Oil mist
 - particle size distribution 349-363
 - sampling and analysis 335-348
- Organic pollutants
 - sampling, silica gel 103-114
- Ozone
 - effect of Cr(VI) production in welding 430-434
- Ozone exposure
 - plasma welding/cutting 159-161
- Paint
 - formaldehyde exposure from 289-294
 - solvent exposure from 289-294, 307-317
- Passive sampling 103-114, 263-265^C, 295-306, 319-327
- Personal monitoring
 - uv radiation exposure 163-170
- Personal sampling
 - of. passive and biological monitoring 295-306
 - coke oven emissions 52-54
 - hard rock mines 139-151
 - oil mist 346-347, 351-352
 - total dust 89-102
 - wood dust 174-175
- Pesticide exposure
 - fungal 209-217
 - plywood plant 21-22, 24-26
- Phenol exposure
 - plywood plant 21,23-24
- Phenoxazine
 - percutaneous absorption, rats 115-122
- Pig farming
 - airborne contaminants 201-208
- Plasma lead
 - of. other biological indicators 219-228
- Plasma welding and cutting
 - exposure to toxic agents 153-161
- Plywood industry
 - air contaminants in 19-29
- Polycyclic aromatic hydrocarbons (PAH)
 - air sampling 22, 481-495
 - analysis 54-58
 - exposure
 - coke ovens 58-59
 - plywood plant 22, 25-26
 - roadworkers 446-449, 451-454
 - particle sizing 489
 - stability 486-490
- Polysulphone film badges 163-170
- Printing industry
 - solvent effects 307-317
- Prize
 - Albert Policard 137-138
- Protective clothing
 - chemicals permeation 381-395
- Pumps
 - gas-modifier 469-479
- Quality control, fibre counting 413-424
- Quartz exposure
 - sampling and assessment 139-151
 - screening test 31-40
- Regular Inter-Laboratory Counting Exchange (RICE) 411-425
- Respirators
 - FFR, fibre release from 131-133^C
 - guide to 269^C
 - helmet, protection factor 60
 - Respiratory allergy 128
- Risk assessment
 - animal extrapolation 378^B
- Roadworkers
 - health hazards 445-454
- Safety Science Abstracts 271
- Sampling pumps
 - Simpeds 144
 - Simquads 145
- Seals, rotary pump
 - vapour detection at 241-247
- Selective Area Electron Diffraction 186
- Sensitizing agents
 - hygiene standards for 128-130
 - 'Sick building syndrome' 275-287
 - See also: Indoor environment
- Silage making
 - formic acid exposure monitoring 329-333
- Silica analysis 145-150
- Silica exposure
 - roadworkers 446-449
 - screening test 31-40
- Silica fibres
 - in sugar cane 365-370
- Silica gel
 - sampling, organic vapours 103-114
- Size-selective sampling
 - ACGIH recommendations 518-521^C
 - coke ovens 52-54
 - hard rock mines 140-143
 - pig housing 203, 206-207
- Skin allergy 126-127
- Solvent exposure
 - comparison of sampling methods 295-306
 - furniture industry 289-294
 - mixtures 307-317

Subject Index

- plywood plant 27
- roadworkers 447, 450-452
- Solvent recovery
 - exhaust ventilation 249-256
 - from activated carbon 319-327
- Sugar cane
 - silica fibres in 365-370
- Terpenes exposure
 - plywood plant 25-27
- Thermal control
 - office environment 276-286
- Toluene exposure
 - in solvent mixtures 307-317
- Toxicity testing 135^B
- Training in occupational health 7-18, 376^B
- Triarylmethane
 - percutaneous absorption, rats 115-122
- Ultraviolet radiation exposure
 - personal monitoring 163-170
- Ventilation
 - exhaust hood design 497-513
 - control of office environment 276-286
- solvent removal, discharge air 249-256
- systems 267-268^B
- Verticillium lecanii
 - toxicology 209-217
- Vibration exposure
 - bone and joint changes 461-468
- Welding
 - arcing, automatic recording 123-124
- Welding fume
 - analysis 441
 - barium in 515-517^C
 - emission rate test 435-444
 - exposure 153-161
 - hexavalent chromium in 427-434
- Wood dust exposure
 - furniture industry 171-184
 - plywood plant 24-25
- Wrist
 - vibration effect 461-468
- X-ray diffraction
 - silica analysis 145-150
